

## Curved Chisel

MPR1057

### Description

An orthopedic chisel for sculpting bone. The low-profile shaft and blade design minimizes visual obstruction during procedures, and the stainless steel blade is curved to allow for precise sculpting in anatomically challenging areas. The handle is made from a durable, corrosion-resistant plastic that can be safely sterilized in an autoclave, and is faceted to provide a comfortable grip and stable placement. Designed for controlled bone removal with minimal trauma.

Made in USA.

### Product Specifications

Overall Length	8.25" (20.96cm)
Handle Length	3.75" (9.53cm)
Handle Diameter	1" (2.54cm)
Shaft/Blade Length	3.75" (9.53cm)
Shaft Diameter	0.35" (9mm)
Tip Width	0.75" (19mm)
Curvature Angle	90°
