

MPR Bone Spreader

MPR398.93

Description

An instrument for spreading bone or bone fragments, providing better access and visibility during osteotomy and fracture repair procedures. The working end features one double-pronged forked tip and one single-pronged tip, allowing for insertion into tight spaces. The fluid action and speed-lock mechanism ensure controlled spreading of bone tissue, minimizing risk of trauma to the patient. Made from solid stainless steel for durability and longevity, and easy cleaning/sterilization.
