

MPR Microplasty Ligamentum Cutter

MPR31-5555-37

Description

A cutter used to sever the ligamentum teres femoris during hip replacement procedures using a minimally invasive approach. The knurled handle ensures a secure, comfortable grip, its thin, curved blade allows access to the ligament without requiring the femoral head to first be dislocated from the acetabulum, and the specialized tip design both tensions and cuts the ligament.

Made from solid stainless steel for durability, longevity, and easy cleaning/sterilization.

Made in USA.

Product Specifications

Overall Length	10.5" (26.67cm)
Handle Length	5.5" (13.97cm)
Handle Diameter	0.75" (1.91cm)
Blade Length	5" (12.7cm)
Blade Width	0.75" (1.91cm)
