MPR Graft Harvesting Retractor

MPR-1420

Description

A retractor used during ACL repair and similar procedures to harvest bone-tendon-bone (BTB) grafts. The double-pointed tip hooks over the superior pole of the patella to securely retract the surrounding tissue, and the windowed shaft provides an optimal degree of access for harvesting the tendon.

All MPR Orthopedics retractors are designed for optimal performance with minimal risk of trauma. Made from solid stainless steel for durability, longevity, and easy cleaning/sterilization.

Made in USA.

Product Specifications

Overall Length	8.38” (21.27cm)
Handle Length	2.75” (6.99cm)
Window Length	3” (7.62cm)
Window Width (Ext.)*	1.18” (3cm)
Window Width (Int.)*	0.75” (1.91cm)
Tip Length	1” (2.54cm)
Tip Width	0.75” (1.91cm)

*measured at widest point
