

MPR Bone-Holding Forceps, Narrow Jaw

MPR399.051

Description

Reduction forceps for holding and manipulating bones during fracture repair procedures, ensuring precise alignment and stability. Their time-proven design features serrated jaws for a secure grip, and a speed-lock mechanism allowing them to easily be held in the desired position. Made from solid stainless steel for durability, longevity, and easy cleaning/sterilization.

Comparable to Synthes Bone-Holding Reduction Forceps* (399.05 or 399.051).

Product Specifications

Overall Length	9.45" (24cm)
Tip Spread	1.69" (43mm)
