

MPR Reusable Total Knee Pad

MPR-ECOKNEE

Description

A total knee pad made from a special biodegradable viscoelastic polyurethane foam which can be sterilized and reused. It has been rigorously tested and proven to maintain over 75% of its original integrity after 20 autoclave cycles, and breaks down up to 90% under ASTM D5511 conditions, helping hospitals and surgery centers meet sustainability goals and cut single-use pad waste by as much as 95% without any effect on patient safety.

Fits Alvarado, TK3, and all boot-style knee positioning systems, and integrates with standard instrument sets, requiring no workflow changes.

All MPR products are 100% latex-free.

Made in USA.

Product Specifications

Length	21.75" (55.25cm)
Thickness	0.5" (1.27cm)

Cleaning & Sterilization

Between uses, remove any debris or impacted material from the pad, and sterilize in an autoclave at 135°C/275°F for 4 minutes, with a 30-minute drying period.
