MPR Femoral Lifter/Distractor

MPR-4844

Description

Also known as the Mikhail U-Shaped Femoral Distractor; an instrument used in hip procedures to distract the femur from the tibia. The knurled handle ensures a secure, comfortable grip, and the slender shaft easily slides between the femur and tibia, and is designed to provide optimal leverage when distracting the bone.

Made from solid stainless steel for durability, longevity, and easy cleaning/sterilization.

Made in USA.
