MPR 45° Knee Retractor, Small

MPR-6290-00-076

Description

A retractor used during knee procedures such as Total Knee Arthroplasty, revisions, and ligament repairs to retract soft tissue and grant easier medial and/or lateral access in tight spaces. Its loop-ended handle helps ensure a secure grip, and the thin design makes it ideal for use in anatomically challenging areas.

All MPR Orthopedics retractors are designed for optimal performance with minimal risk of trauma. Made from solid stainless steel for durability, longevity, and easy cleaning/sterilization.
