MPR Thin Glenoid Retractors

MPR1910

MPR1920

Description

Retractors used during shoulder arthroscopic surgeries to retract the humeral head and access the glenoid. Their thin construction compared to other retractors keeps them lightweight and maximizes precision and effectiveness, and the dual-pointed tip ensures a secure grip on tissue.

All MPR Orthopedics retractors are designed for optimal performance with minimal risk of trauma. Made from solid stainless steel for durability, longevity, and easy cleaning/sterilization.

Product Specifications

#	DESCRIPTION	LENGTH	BLADE L.	BLADE W.	TIP L.	TIP W.*
