MPR Bone Spreader

MPR398.93

Description

A self-retaining instrument for spreading bone or bone fragments, providing better access and visibility during osteotomy and fracture repair procedures. The working end features one double-pronged “beaked” tip and one single-pronged tip, allowing for insertion into tight spaces. The fluid action and speed-lock mechanism ensure controlled spreading of bone tissue and easy retention, minimizing risk of trauma to the patient.

Made from solid stainless steel for durability, longevity, and easy cleaning/sterilization.

Product Specifications

Overall Length	4.88” (12.38cm)
Handle Length	3” (7.6cm)
Handle Width	0.43” (1.1cm)
Tip Width	0.12” (0.3cm)
Beak Width	0.28” (0.7m)
Maximum Spread	0.5” (1.25cm)
Tip Angle	38°
