MPR K-Wire Tractors

MPR-121-02

MPR-121-03

Description

Also known as traction bows, Kirschner bows, or Kirschner extension bows. Instruments for holding K-Wires in tension during orthopedic procedures. The serrated clamps at the ends of the arms ensure a firm grip on the wire, and the handles feature five holes for attaching hooks for suspension. MPR Orthopedics offers K-Wire Tractors in two different sizes; both are made from solid stainless steel for durability, longevity, and easy cleaning/sterilization, and come with a set of 3 hooks.

Use with threaded K-Wires to ensure a proper grip.
